CREATING A CSV FILE CONTAINING ALL LINKS OF PDF'S

1.Install chrome extension[Instant Data Scraper-Flavr Technology]

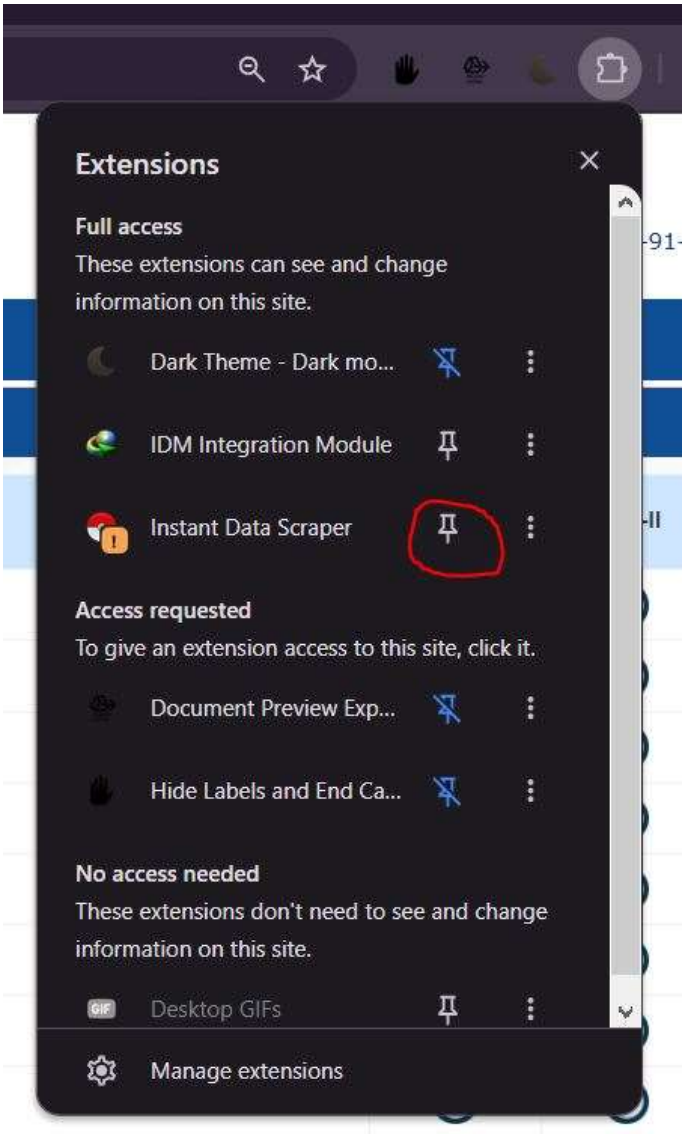

2.Go to that website containing institution allotment list or visit any website and click on*" institute wise allotment list"* link.

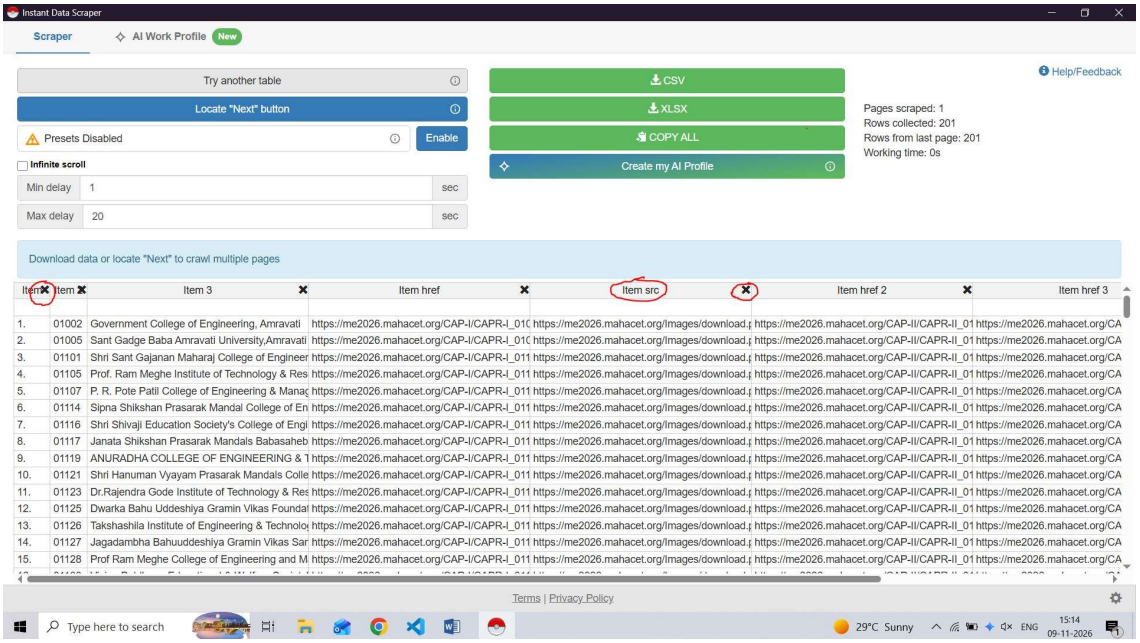

[Note:- In institute wise allotment link the embedded table should contain/show institute code,institute name and CAP-1,…,CAP-N]

3.Click on instant data scrapper extension [located on top right column]…if not showing click on puzzle icon then pin the instant data scrapper extension]

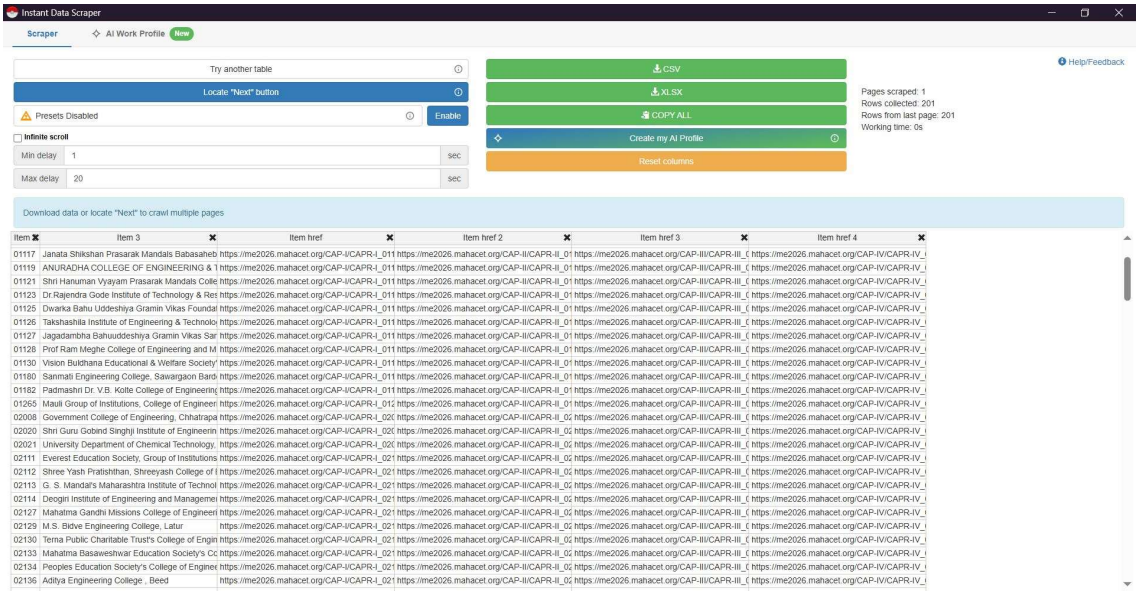

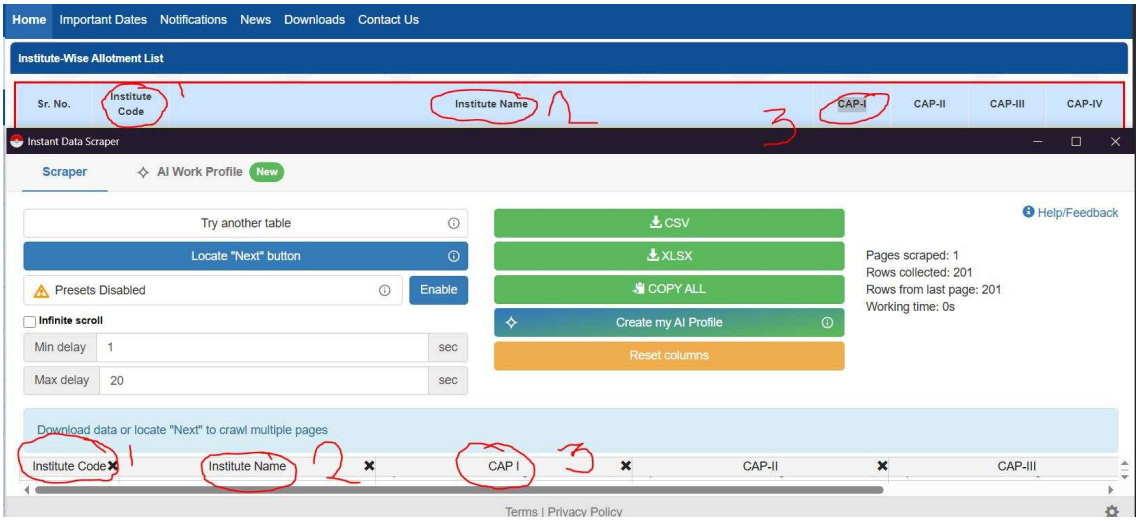

4.After click on that icon remove Sr.No and img src columns

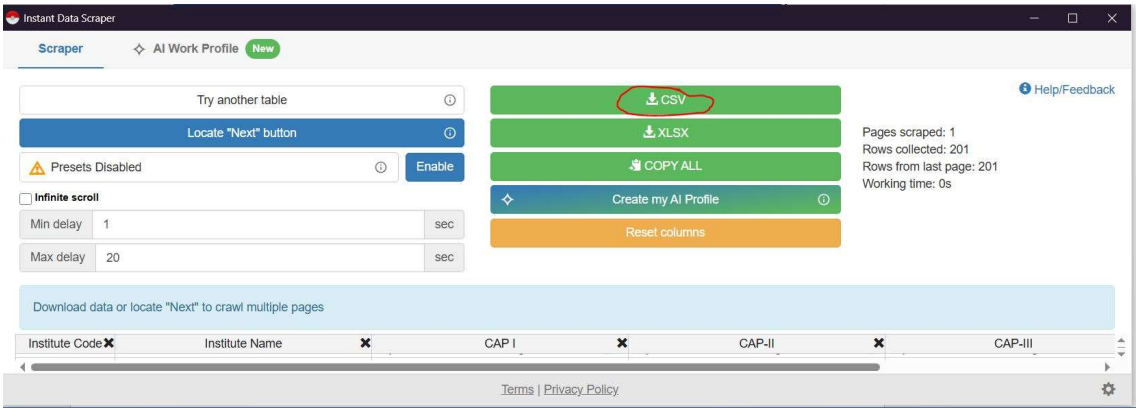

[NOTE:The final window should look like this]

5.Make the changes in column names

6.Click on Green button “CSV”

A CSV file would be downloaded containing institute code,institute name ,CAP 1 (links),.., CAP N (links)

7.Copy csv file containing the download.py code

8.Open the code and change 1 line

```
csv_file = "me2026.csv"
```

replace the “me2026” part with your csv filename containing all links…
